**Election/Restriction**

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-4, 9, 12, 14, 16, 18, 19, drawn to a mixer circuit, classified in class 455, subclass 313+, class 327, subclass 103 and class 329, subclasses 315-371.
  - II. Claims 5-8, 10, 13, 15, 17, drawn to a mixer, classified in class 455, subclass 313+, class 327, subclass 103 and class 329, subclasses 315-371.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct if they do not overlap in scope and are not obvious variants, and if it is shown that at least one subcombination is separately usable. In the instant case, subcombination I has separate utility such as a single V/I converter (Figs. 1, 9) and in that the two outputs of the current divider differs from each other, while subcombination II has separate utility such as two V/I converters and an attenuator (Figs. 4 and 10). See MPEP § 806.05(d).
3. Because these inventions are independent or distinct for the reasons given above and that the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Art Unit: 2685

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Duc M. Nguyen whose telephone number is 571-272-7893. The examiner can normally be reached on Monday-Friday (9:00AM - 6:00 PM).
